Monitoring and Alerting Industries - Gas Leakage Detection	Entice How does someone initially become aware of this process?	Enter What do people experience as they begin the process?	Engage In the core moments in the process, what happens?	Exit What do people typically experience as the process finishes?	Extend What happens after the experience is over?
Steps What does the person (or group) typically experience?	News about Industrial Accidents The user feels insecure so looks out for a solution News about Awareness Information from other Industrial Friends The user gets suggestions from other industrial friends.	Request demo of the product/service Payment Authentication & Complete Installation The user requests to view the demo of the service / product. The user pays the service / product. The user pays the dashboard & provides proper access rights to others. The user pays the dashboard & provides proper access rights to others.	RealTime Monitoring Detect Gas Leakage Alarming System The user gets notified. The user gets access to realtime monitoring of the gas leakage detection system. The gas sensors detect the gas leakage. The Alarm System generated message notification is sent to the user. A system generated message notification is sent to the user. An actuator is used to close the gas valves. Exhaust fans are turned on to disperse the gas.	The gas leakage data gets stored in the database and updated in monitoring system. Review Safety Check After the incident, the user reviews the service provider to safety check the working condition of the product incase of any damage.	Past Incidents The incident gets stored in past data of the system. The unotific service rethe past data of the past data o
Interactions What interactions do they have at each step along the way? People: Who do they see or talk to? Places: Where are they? Things: What digital touchpoints or physical objects would they use?	Employees and Public users Industries working with Inflammable gas Social Media Advert	Recorded / Live demo of the product is displayed to the customer. Payment on delivery of product/ after installation is done. Payment on delivery of product/ after installation of gas sensors at specific locations is done. Installation of gas sensors at specific locations is done.	Gas Leakage tends to start from unmanned specific locations. Realtime monitoring of status of the sensors. Full control of sensor by the authorized users. Alarming for industrial workers to notify about gas leakage. Gas Leakage can occur due to damage of valves due to excess heat or pressure.	Dashboard updated with incident information. Request from service provider to analyze the cause of gas leakage. Review request from the service provider.	Past Incidents data is stored. Recommincrea me
Goals & motivations At each step, what is a person's primary goal or motivation? ("Help me" or "Help me avoid")	Prevent Gas Leakage Avoid Fire accident gas leakage.	Help to assure about the industry safety Help to assure about the workers safety Help to feel safe and reliable about the service provided.	Help me to feel good about the gas leakage detection system. Help me to feel good a secure about the realtime monitoring of the gas leakage detection system.	Help me to feel Help me spread the grateful to the gas word about the gas leakage detection leakage detection system.	Help me see the past gas leakage area r monitored
Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Its comfortable to use the Realtime Monitoring System. Graphical Representation of It's reassuring to industrial parameters are exciting to see.	Feel safe and Feel reliable. Satisfied with secure. services provided.	Our Product tend to be so reliable that people reassure it. People feel reliable on our product because of high safety rating.	People feel secure and happy. People look back at the past events inorder to increase safety measure.	People like safety measure recommendations.
Negative moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	Fear of commitment Cost on a service of fear.	Trepidation about the product purchase. Trepidation about the product purchase.	Feel of false alarm. Worried about the safety of workers. Fear of fire accidents.	No Faster response to gas leakage. More efficient methods to prevent gas leakages. More efficient methods to save workers from fire accidents.	
Areas of opportunity How might we make each step better? What ideas do we have? What have others suggested?	Provide simpler Show highlights and safety cerfications of product. Show highlights and safety cerfications of the product.	Show highlights and safety cerfications of the product.	Faster and understandable notification system.	How to totally eliminate the chances for fire leakage incident?	How to help people store and review the past incident data?
